PROJECTS

- **Resume Website**

- Simple, modern, responsive website made with JavaScript, HTML and CSS.

- **D&D Character Creator**

- An Android app built with Java, utilizing multithreading for performance and a Room database with SharedPreferences for persistent character data storage and management.

- **WebStore for wall decorations**

- E-commerce website built with .NET Razor Pages, using C# and LocalDB to allow users to browse, add, and purchase decorative wall items.

- **Peer-to-Peer Messenger**

- A real-time chat app developed with React, Node.js, Socket.IO, and JavaScript, enabling multiple users to connect and exchange text messages through a peer-to-peer architecture.

More projects can be found on my [GitHub](#).
